SILENCERS

The use of natural fibre sound absorbing material enclosed in special anodised aluminium casings has allowed creating this new range of silencers that considerably reduce noise made by air at the vacuum generator exhaust.
There are two versions with different lengths: the longer the length, the more noise will be reduced.
Noise reduction: from -13 to -20 dB (A)
Working temperature: from -20 to +100°C

Item	A Ø	B	C	C1	D Ø	d Ø	Weight g
